

Alvosenet Product Installation Guide

A. System Requirements

Windows 7, Windows 8/8.1, Windows 10

Alvosenet products were tested with the following configurations:

Windows 7, Windows 8.1, Windows 10, Microsoft Internet

Explorer, Google Chrome, Mozilla Firefox, Google Search, Bing Search, Yahoo Search, Yahoo Mail, Gmail, Hotmail/Outlook.com, Facebook Messages/Chat/Post, Twitter Messages/Post, Skype Chat, MySpace Chat/Messages/Post, Instagram Post, YouTube Search, Microsoft Office Word, Notepad

Minimum System Requirements: CPU - 2.20 GHz, RAM - 2.5 GB, Language – English

B. Download and Installation

1. After making the payment on PayPal and coming back to our website :
 - (a) For Non-Web Edition, skip to Step 2.
 - (b) For Web Edition, please enter your Security Keywords and Configuration Options. Then skip to Step 3.
2. Click "Download License" to download the license key to the computer you want to monitor.¹
3. Click "Download Product" to download the product file to the computer you want to monitor.
Note: If you wish to install the product on another computer, please copy or transfer the product file(s) to the other computer.
4. Execute the product file with .exe extension to start the installation process.
If you see a message indicating "Windows Firewall has blocked some features of this program", please click "Private networks such as my home and work network" under "Allow Alvosenet.exe to communicate on these networks" and then click "Allow access".
5. Enter the registered email address used for product purchase in order to verify the license and deliver the security report.
For Web-Edition: Order number is also required during the installation.

6. Enter the Security Keywords you want to monitor.¹ Separate each keyword with a comma. A keyword has to be at least three characters long and can only consist of characters of "a-z", "A-Z", or a space.
7. You can change the Configuration Options¹ or skip to use the default options.
8. Alvosenet will start to monitor and/or block Internet and Web activities after the computer is rebooted.
9. For Windows XP users: When you see "Which user account do you want to use to run this program?", please select "Current user" and uncheck "Protect my computer and data from unauthorized program activity."

¹ This is only applicable for Non-Web Edition.

² For Web Editions, please go to [Manage > Option](#) on our website.

C. How to uninstall Alvosenet

1. Go to the installation folder for the product. Launch unins000.exe.
2. If you see a message indicating "Do you want to allow the following program from an unknown publisher to make changes to this computer?", please click "OK".
